PROJECT
BACKGROUND

MEASURE OF AMERICA

THE LEONA M. AND HARRY B.
HELMSLEY
CHARITABLE TRUST

The **DATA2GO.NYC** website and mobile app bring together for the first time federal, state, and city data on **over 300 indicators in a dozen areas** vital to improving New Yorkers' lives – empowering users to pinpoint particular groups and areas in need, craft solutions, target policies and services, track progress, and advocate for change.

A one-stop shop for neighborhood-level data broken down by **community district** (150 indicators are also available by **census tract**), **DATA2GO.NYC** enables policy-makers, philanthropists, social service delivery agencies, and community-based organizations to map indicators across the city, prepare unique community district dashboards, test relationships between indicators, download data, and print or share their results at the click of a button.

DATA2GO.NYC was created by **Measure of America**, a nonprofit, nonpartisan research and advocacy initiative of the **Social Science Research Council**. We provide easy-to-use yet methodologically sound tools that measure what matters for human well-being, freedom, and opportunity. **DATA2GO.NYC was made possible by the generous support of The Leona M. and Harry B. Helmsley Charitable Trust.**

EVERYONE COUNTS.
